Course: B.Tech.(CSE)

Semester: 6^{Sem}

Roll No:

Index

Sr. no	Experiment	Signature
1.	Write a program to conduct uninformed and informed search.	
2	Write a program to conduct game search	
3	Write a program to construct a Bayesian network from given data.	
4	Write a program to infer from the Bayesian network.	
5	Write a program to run value and policy iteration in a grid world.	
6	Write a program to do reinforcement learning in a grid world.	

Output:

Optimal Policy:

```
[[0 0 0 0]
 [0 0 0 0]
 [0 0 0 0]
 [0 0 0 0]]
```

Output:

Optimal Policy:

```
[[0 0 0 0]
 [0 0 0 0]
 [0 0 0 0]
 [0 0 0 0]]
```

INDEX

[illegible]

Output:

Shortest path: ['A', 'C', 'D', 'E']

Output:

Found E

Output:

Before AI Move:

```
X | O | X
---+---+
| O |
---+---+
| |
```

After AI Move:

```
X | O | X
---+---+
| O |
---+---+
| X |
```

Output:

Nodes: ['Rain', 'WetGrass', 'Sprinkler']
Edges: [('Rain', 'WetGrass'), ('Sprinkler', 'WetGrass')]

Output:

```
+-----+
| WetGrass | phi(WetGrass) |
+-----+
| WetGrass(0) | 0.4000 |
+-----+
| WetGrass(1) | 0.6000 |
+-----+
```

Output:

Optimal Policy:

```
[[1 2 1 0]
 [1 0 1 0]
 [2 1 1 0]
 [0 2 2 0]]
```
